Item	Description	Action
1	**RECEIPT AND ACCEPTANCE OF PREVIONS MEETING NOTES**	
1.1	Everyone confirmed receipt of the previous meeting notes. Notes accepted without change.	
2	**GROUP MEMBERSHIP**	

UNCONFIRMED

Item	Description	Action
2.1	Resignations – Nil.	
2.2	New Members: Nil Action - Invite Brad Gornall to CRG meeting	
3	**MATTERS ARISING FROM PREVIOUS MEETINGS**	
3.1	4.1.3. John Mulholland listed the following application being considered: • Waste quantity change – 300,000 tonnes per annum (tpa) to 390,00 tpa. Following discussion, community concern relates to the impact on vehicle movements, vehicle sizes, vehicle weights. **Action Item: CA requested to provide information of the change in vehicle movements associated with the proposed increase in waste tonnage – vehicle number, types, load size etc.** ***Action has not been completed. John to follow up and disperse information to Group as soon as possible*. Sent 26th/9/19**	
3.2	5.2 Ellen Lilley advised that she was struggling to find any organisations requiring funding. Possible suggestions were: closed – John to assess Beard day out at B&B tavern 14th March • Dardanup Primary School. • Football Club • Legacy. • Tennis Club. •	
4	**STANDARD AGENDA ITEMS**	
4.1	**Operational Update:**	
4.1.1	Current Operational Activities: • Litter management	

UNCONFIRMED

Item	Description	Action
	○ Litter Screens should be available for use by the 1st Week in December 2019. Delayed – 2x delivered with remainder expected before December end ▪ The screens are being constructed locally. ○ Activ continue to work up to 100 meters in the conservation park. ○ Cleanaway are still consulting with the DBCA. • Stormwater management. ○ Golder's appointed; site master plan updated, with design completed for southern boundary and reviewed • The dams currently have plenty of capacity. • Weed control – ongoing manual extraction • DWER audit 10/12 with focus on dust ○ Watercart due mid-January, currently hiring 2nd unit, ○ License application including ability to shred ready to submit for planning – required for mulch; have engaged with BHRC and J&P ○ Engaged an external consultant to assist in development of the DMP, including the measurement. Les (Environmental Business Partner) will be engaging with Council in fit for purpose. **Action; define the communication channel for complaints to add CWY staff so as issue can be addressed immediately – Sean to send contact details** **Neil to look into Council site detailing CWY contact for immediate address of complaints**	
4.1.2	Changes to Operations: 1. No new contracts. 2. No waste coming from Barrow Island. 3. Waste coming from Kalgoorlie. (Class 3) Approximately 200 ton a month. (5 road trains) There was uncertainty as to whether this contract has actually started. 4. Lost 15ktn contract in Metro area 5. 3ktn through December from MRF fire. 6. Not expecting to see an increase through 2020, due to comingle after MRF fire – Jan may see higher volumes as SMRC ramps up, however any additional likely offset by lost SMRC **ACTION: Cleanaway to follow up.** 7. No new contractors. a. K-Trans have the contract till 2022 b. Depiazzi continue with open top bins from metro area. Depiazzi deliveries will half in volume due to the closing of Bayswater transfer station, however no change to volume as it will come out of Welshpool	
4.1.3	Planning Applications: John Mulholland listed the following application will be proceeded with.: 1. Waste quantity change – 300,000 tonnes per annum (tpa) to 390,00 tpa. a. Following discussion, community concern relates to the impact on vehicle movements, vehicle sizes, vehicle weights.	

UNCONFIRMED

Item	Description	Action
	2. Construction & Demolition (C&D) waste processing – sorting and crushing – 20,000 tpa (quantity included in the above tonnage increase). Considering the economic viability of this proposal. May not be pursued. 3. Greenwaste shredding – 3,000 tpa (quantity included in the above tonnage increase). 4. Litter netting – potentially 10 m tall. 5. Changed operating hours for putrescible waste vehicles. CA has five road trains doing the Perth/Dardanup waste transfer. Three of these manage two trips per day, while the other two consistently miss the second trip due to the site closing at 6.00 pm. CA propose to request an extension of operating hours for the putrescible landfill operations from 6.00 pm to 8.00 pm. It was pointed out that a single road train results in two site entries as the road train is disassembled at an off-site staging area, with the two trailers being brought to site separately. Following discussion, community preference is that the hours be extended at the end of the day and not earlier in the morning. It was acknowledged that the Cristal vehicles have access to site up until 10.00 pm; hence a few more vehicles in the evening is not seen as unreasonable. 6. New office compound – relocation. Planning consultant have been appointed for the above. **John Mulholland has advised that item (1) will be a separate planning item. Items (2-6) will be bundled together as one item.**	
4.1.4	Environmental Applications: 1. All of the above Planning Applications, other than the office relocation will need Environmental Approval. Hence, there will be associated applications. **John Mulholland advised that item 4.1.3.1 above has already been lodged with DWER.** **Item 4.1.3.6 above is expected to be completed in the first half of 2020.** 2. Ellen Lilly noted that the EPA has determined not to formally assess the lithium tailings proposal. There were 18 appeals against this decision. CA has four weeks to respond to the appeals and thereafter the Minister will determine the outcome of the appeals. **John Mulholland advised that Cleanaway were in the process of responding to the 18 appeals against the EPA decision. Email sent advising CWY will not proceed**	
4.1.5	Other Operational Items: **1. Concerns were raised regarding the litter nets for the southern boundary. John Mulholland advised that he had spoken to the project manager, and that an environmental assessment will be included into the proposal.**	
4.2	**Environmental Management and Compliance Update:**	

UNCONFIRMED

Item	Description	Action
4.2.1	Groundwater Monitoring: 1. Sean Sibly advised that new groundwater testing was done this month, and that the results will be available by the next meeting of the DCRG, expected to be the 28th of November 2019. Completed and requires upload to webpage. Summary page, as requested in September meeting distributed.	
4.2.2	Stormwater Management and Monitoring: Discussed above.	
4.2.3	Dust Management: Discussed above.	
4.2.3	Litter Management: Discussed above	
4.2.4	Landfill Remediation: Sean Sibly advised Louis Sparkes is engaging a consultant to prepare a landscaping plan. John Mulholland explained to the Group that: as part of the process of building Cell 7, that they will be relocating the clay to create a batter, so it can be seeded, with the aim of reducing the "scar" that is visible from the town. John also mentioned that cell 8 would be built straight after cell 7, so the two cells can be operational at the same time to better manage some of the environmental aspects of the operation. – Mainly working high when there is no wind and working low when there is wind.	
4.2.5	Other Environmental Items: A question was asked regarding the responsibility of the land after closure. **John Mulholland advised that Cleanaway expect the site to be operational until 2031 and that Cleanaway will be responsible for it to at least 2056. (these were approximate dates and need to be confirmed)** **ACTION: Cleanaway to Confirm Dates. Non produced**	
5	**OTHER BUSINESS**	
5.1	***1.*** Concerns regarding odor. – Determined from BHRC	
5.2	1. John raised the matter regarding PFAS. This was in response to seeing some PFAS matters on the DCAG site, and the fact that the water monitoring results released for the last meeting established that the site bores currently meet the Australian Drinking Water Guidelines. a. Ellen Lilley responded by saying that PFAS remains a concern and suggested that we wait for the next test results.	

UNCONFIRMED

Item	Description	Action
5.3	b. All the group agreed that it would be good to get an easy to read document in "Layman's" terms to understand the water results more easily. The current results are very scientific. **ACTION. Cleanaway to talk to water monitoring consultants with an aim of finding an easier to read summary of the water results.** Completed as above c. The group all agreed that we need some more information about PFAS. **ACTION. Cleanaway to find some more relevant PFAS information that is useful to the DCRG.** Uploaded to webpage via link	
6 6.1	**FUTURE AGENDA ITEMS** Nil identified.	
7	**Date of Next Meeting:** • Thursday 28 November 2019, 5.30 pm to 7.30 pm. • February 25th 2020	
8	**Date of Future Meetings:** • Thursday 30 January 2020 • Thursday 26 March 2020 • Thursday 28 May 2020 Meeting duration - 5.30 pm to 7.30 pm.	

UNCONFIRMED
