Absorbent pads, rolls, booms and pillows

We have a wide range of absorbents to clean up spills or leaks around the workplace. Our range of General Purpose, Oil Only and Hazchem absorbents are durable and we can provide an absorbent solution to fit any budget.

Choosing the right absorbent

Have you noticed how some absorbents are grey in colour, some are white and others are yellow or green? Below we've explained what colour to use for different types of spills and when to use them.

GENERAL PURPOSE ABSORBENTS are grey in colour and are also sometimes referred to as Universal. As a general rule of thumb if the spill has happened indoors use a grey product to absorb both oil and water based substances (technically referred to as hydrophilic). Best choice for almost any situation.

OIL ONLY ABSORBENTS are best used outdoors to absorb just oil based spills (petrol, diesel, and solvents) and are technically referred to as hydrophobic. These products are white in colour and also come in a range of shapes and sizes. They are best used outdoors.

HAZCHEM ABSORBENTS **CHEMICAL** or toxic spills require polypropylene meltblown absorbents. These are yellow in colour and are referred to as Hazchem. Please remember that chemical spills can be extremely hazardous and should not be cleaned up without the correct training or protective equipment. These can be used indoors or out.

For more information call **Cleanaway** on **13 13 39** and dial **4** for Hydrocarbons

Spill kits

Cleanway has a comprehensive range of spill kits. We can also custom design a spill kit to suit your needs. Spill kits are available in Oil Only, General Purpose and Hazchem.

Loose absorbents

Organic floor sweep

Our Organic floor sweep is manufactured locally from recycled organic cellulose products that would otherwise be burnt or end up in landfills. It absorbs 4 times per kg more liquid than most clay and mineral based absorbents making it more cost effective. Our floor sweep can be composted and does a superior job leaving surfaces dryer and less slippery.

Collapsible bunds

Our bunds unpack quickly for emergency situations and conveniently stores in small spaces which makes it a great portable bund. The drive through design is ideal for small equipment decon, saddle tank ruptures and transformer storage. Our bunds have no parts to assemble or dismantle making them fast and easy to set up and repack. Collapsible bunds are reusable. Just clean and place in the storage bag for re-use.

Magic Monkey absorbent

This lightweight dry granular sorbent is safe for people, plants, animals and food processing facilities. Effective on most types of spills including oils, fuels, chemicals, paint, antifreeze bases, bodily fluids, non-hydrofluoric acids and many others. The granular sorbent is sprinkled onto the spill which then turns to a solid. The spill can then be easily swept away with a broom.

Spill pallets and overpack drums

Cleanaway have a complete range of spill pallets, drum spill pallets and overpack drums to ensure the workplace is compliant in case of spills and leaks.

- All polyethylene construction
- Offer excellent chemical resistance and will not rust or corrode
- Spill pallets have access for forklift
- Spill pallets and overpacks available different sizes

Drive over wall bunds

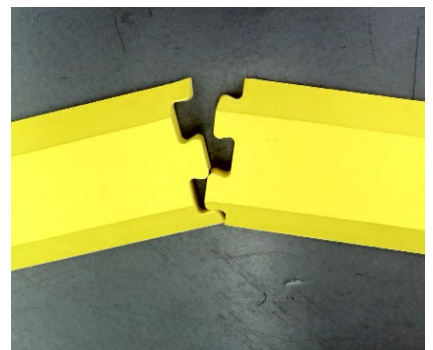

Drive over bund

The wall bund is designed to contain and prevent liquids from migrating outside the area of its containment. Used primarily as a wall that has a footprint which is only 14cm wide by 7.5cm high. The wall bund has a half-moon collapsible sponge which is encased in a strong yellow truck tarp vinyl material. This provides a watertight, nonslip surface and a round footprint to walk on or driver over. The wall bund collapses and springs back to its original half-moon shape providing the perfect wall bund for liquid containment.

Stick down bunding

Our stick down bunding has been designed to prevent a spill from migrating into the yard from your shed. It has a bevelled edge on either side and a flat top surface which allows a forklift to move unrestricted up and over the top. It is glued on one side ready for you to stick down.

Stormwater protection

Drain wardens

Our drain wardens provide the industrial site with three benefits

- Filters and holds up to 20L of spilled oil / petroleum base fluids
- Prevents cigarettes, paper and silt from clogging up the sites drainage system
- Catches any accidental spills and prevents them from migrating to other areas

Neoprene drain seals

Spill Ready Neoprene Drain Seals are black and highlighted with safety yellow tape. They are flexible, durable, non-absorbing and tear resistant. Drain seals can be easily cut to special shapes and sizes if needed. Clean them with soap and water. Drain seals are available in a number of sizes.

Storage cabinets

We offer a range of storage cabinets including flammable liquid, corrosive substances, aerosol and gas cylinder stores and more.

Showers and eyewash

Our range of showers and eyewash are stainless steel construction for long service life in all environments. They comply with AS4775 and ANSI Z358 for emergency eyewash and shower equipment. We supply different models to suit any application.

Cleanaway can provide a solution to fit your budget

Ecoform is a ground breaking natural alternative to traditional polypropylene meltblown absorbents. Made from a mix of recycled and renewable cellulose materials, creating a high performance natural range of absorbents. The use of natural materials does not compromise performance, with EcoForm generally outperforming meltblown absorbents. Available in pads, rolls and booms.

The Classic range is a no fuss, but highly absorbent and economical range of absorbents. Made from 100% meltblown polypropylene resin, coming in a range of weights. They are great for high volume and everyday use. Available in pads, rolls, booms and pillows.

The Premier range of absorbents has been designed for great performance and absorbency. Including features such as laminated cover stocks for strength and durability, and fast wicking action. Some of the range utilises recycled synthetic fibres, giving this range green credentials. If you need high performance, choose the Premier range. Available in pads and rolls.

The Spill Ready brand of Spill Management equipment and products are focused on performance and quality. Extensive research has gone into all products in the range to ensure their performance.
