

POLLUTION INCIDENT RESPONSE MANAGEMENT PLAN – (PIRMP)

Nationwide Oil Pty Ltd

Waste Transporter

EPA LICENCE NO. 7100

Industry is now required to report pollution incidents **immediately** to **ALL** regulatory bodies listed below.

Call 000 if the incident presents an immediate threat or potential immediate threat to human health, the environment or property.

If the incident does not require an initial combat agency, or once the **000** call has been made, notify the Branch Manager / Operation Manager / Operations Coordinator / Transport Supervisor relevant to your site (see Section 4) who shall then contact the remaining authorities:

Environment Protection Authority	131 555
Safe Work NSW	13 10 50
Comcare	1300 366 979
Local Council	For list of Local Councils see Appendix A
The NSW Ministry of Health	For list of Public Health Units see Appendix B
Fire and Rescue	000
Fire and Rescue without immediate threat	1300 729 579

Also call CWY Spill response 1800 SPILLS (1800 774 557), if appropriate / assistance is required.

1.0 INTRODUCTION

The Pollution Incident Response Management Plan (PIRMP) has been developed to assist with the management of pollution incidents which may occur during the transportation of waste by Nationwide Oil Pty Ltd and may impact the environment, personnel, or the community in which we operate.

When a pollution incident, as defined in Section (2) below, occurs the regulatory bodies listed on Page 1 must be immediately notified.

The Branch Manager / Operation Manager / Operations Coordinator / Transport Supervisor is responsible for notifying the relevant regulator/s, but they may be assisted by the internal Cleanaway Environment and/or the Health & Safety team.

2.0 DEFINITION OF POLLUTION INCIDENT

Under NSW Regulations:

The definition of a pollution incident is:

“Pollution incident means an incident or set of circumstances during or as a consequence of which there is or is likely to be a leak, spill or other escape or deposit of a substance, as a result of which pollution has occurred, is occurring or is likely to occur. It includes an incident or set of circumstances in which a substance has been placed or disposed of on premises, but it does not include an incident or set of circumstances involving only the emission of any noise.”

A pollution incident is required to be notified if there is a risk of ‘material harm to the environment’, which is defined in section 147 of the POEO Act as:

- (a) Harm to the environment is material if:
 - (i) It involves actual or potential harm to the health or safety of human beings or to ecosystems that is not trivial, or
 - (ii) It results in actual or potential loss or property damage of an amount, or amounts in aggregate, exceeding \$10,000 (or such other amount as is prescribed by the regulations), and
- (b) Loss includes the reasonable costs and expenses that would be incurred in taking all reasonable and practicable measures to prevent, mitigate or make good harm to the environment.

Industry is now required to report pollution incidents **immediately** to **ALL** Regulatory Bodies.

3.0 NOTIFICATION OF POLLUTION INCIDENTS & PRE-EMPTIVE ACTIONS

Call 000 if the incident presents an immediate threat to human health, the environment or property.

If the incident clearly requires notification, e.g. truck rollover losing all contents and liquid entering creek, the driver **MUST** notify 000 immediately, followed by **notification to their direct supervisor or manager** who will be responsible for immediate notification to the Operations Manager / Regional Operations Manager or in their absence the General Manager. This Manager is then required to notify the remaining external regulators on page 1.

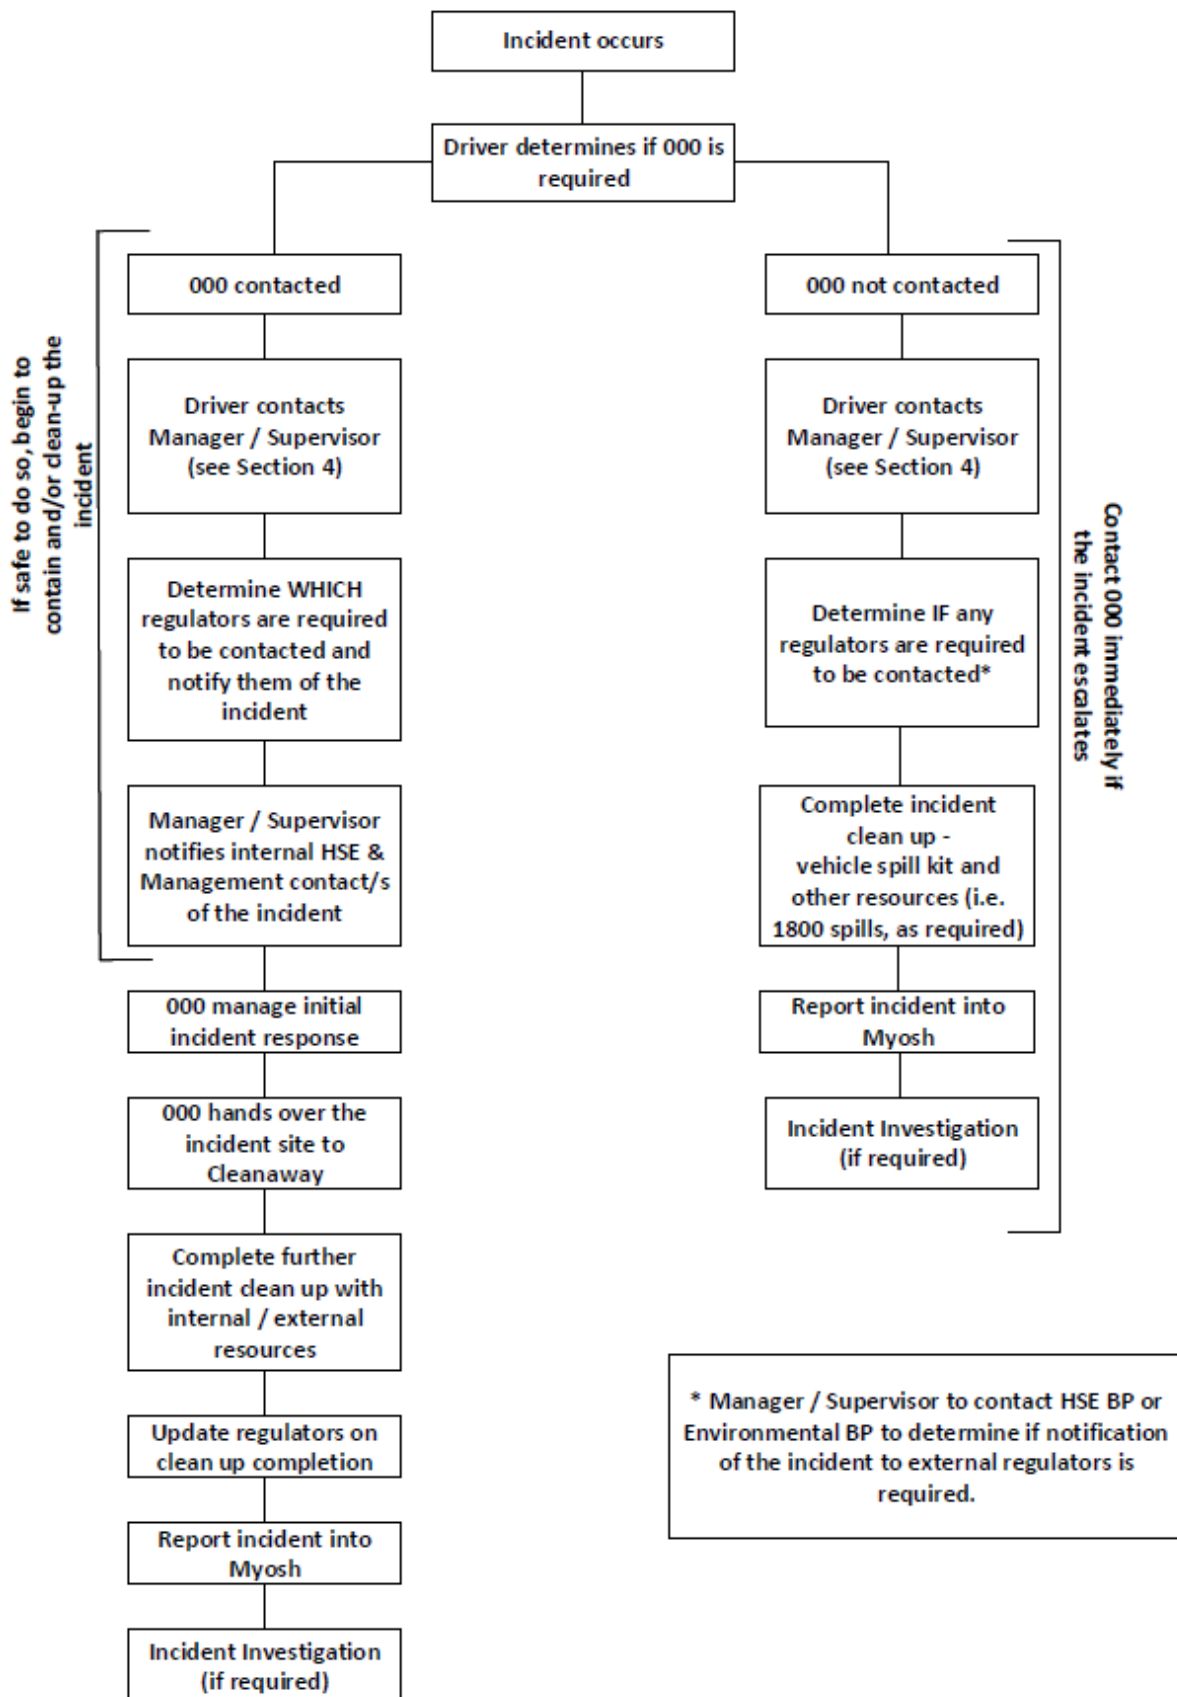

If the driver is unsure if the incident requires notification, they **must immediately contact their direct Supervisor or Manager** and advise that an incident has occurred and provide as much detail as possible. The Supervisor / Manager, in conjunction with the Cleanaway Environmental Business Partner will determine if notification is appropriate based on the information provided.

The driver and other Cleanaway employees will provide any assistance to the Fire Brigade / Other Regulators as far as practical in the clean-up and/or by liaising with local residents potentially impacted by the incident.

To minimise the risk of an environmental incident occurring, the driver will undertake a Daily Prestart check and Monthly Compliance check in alignment with Cleanaway's Standard Operating Procedures. The business will undertake regular inspections and preventative maintenance on all vehicles to ensure the vehicle is in good working order and all safety / spill response equipment is in working order.

The business has developed the following incident response flow chart to assist in the event of an incident. See Section 3.1 on the next page.

3.1 Incident Response Flow Chart

4.0 BUSINESS UNIT CONTACT NUMBERS

Please note, this section has been removed from the version published on the Cleanaway website.

Members of the community can contact the Community Hotline on 1800 213 753 to raise any queries, complaints or concerns with the business.

5.0 COMMUNICATING WITH NEIGHBOURS AND THE LOCAL COMMUNITY [clause 98C(1)(i)]

Impacts on the broader community are variable and depend on location, or other factors such as wind direction and velocity. In the event of a pollution incident occurring (such as a Fire) which has the potential to impact residential areas, communication methods will be used on a case by case basis and in all situations Cleanaway will liaise with Local Council (see Appendix A for contact numbers) and Fire and Rescue to provide early warnings to directly affected residents by the mechanisms described below.

Early warnings are to include details of what the imminent incident is and how those affected can prepare and respond to the incident. The notification shall provide specific information to the neighbouring properties and local community, so it can minimise the risk of harm.

In the event of a pollution incident Cleanaway, in consultation with Local Council, will attempt to provide early warning to directly the community by the following mechanisms as appropriate:

- Telephone calls or door knocking (where appropriate);
- Mail box drops;
- Warning signs;
- Local media source (radio/newspapers); and
- Council webpage updates and media releases;

6.0 STAFF TRAINING AND TESTING PLAN

Toolbox meetings & emergency response training are provided to Cleanaway staff. Training is also provided for the use of the site PIRMP / Transport PIRMP to ensure that all staff are aware of the content, processes and requirements of the plan and competently implement if necessary.

Plans must be tested routinely at least once every 12 months. The testing is to be carried out in such a manner as to ensure that the information included in the plan is accurate and up to date, and that each plan is capable of being implemented in a workable and effective manner. Testing may include:

- Desktop scenarios, or
- Physical Scenarios

Testing records will be maintained in the site training register and/or electronically on the 'MyOSH' database (entered as a completed action).

Plans must also be tested within one month of any pollution incident occurring, where the incident occurred in the course of an activity listed on the licence. An assessment as to whether the information included in the plan is accurate and up to date, and the plan is still capable of being implemented in a workable and effective manner must occur.

Date of last PIRMP test:

07/08/2020, conducted by Haydn Rossback
(E BP) and reviewed by the business
